

Job description

Company: AIS Vanguard Limited
Job Vacancies: Machine Mover/Installer
Reporting to: Branch Manager
Location: Glasgow

The Company

Ainscough Industrial Services is one of the UK's largest privately-owned industrial engineering companies and supports three subsidiary businesses; AIS Vanguard Ltd; AIS Wind Energy Ltd and AIS Eurelo Ltd providing engineering services to industry covering Machinery Installation and Relocation, Mechanical Engineering, Technical and Heavy Lifting and Wind Turbine Generator Construction on a National & International scale.

Purpose of the Role

This is a brilliant opportunity to use your rigging or fitting skills (or preferably both) to take your next step with a forward-thinking organization in a permanent in-house position.

At AIS Vanguard Ltd, we take our business seriously and are committed to driving service excellence and delivering the very best for our customers.

You will have the chance to make a positive, lasting impact on the success of AIS Vanguard and get involved with a wide range of projects.

About the role

AIS Vanguard Limited are looking for a reliable, experienced Machine Mover/Installer to work from our Scottish Branch based in Bellshill. Works are primarily in the Central Belt of Scotland but may be required to cover works throughout the whole of Scotland, the UK & in rare occasions within Europe. Some travel will be required.

The work involved is typically machinery installations/removals, factory moves, heavy or technical lifting projects or any project requiring the movement of machinery, plant and associated ancillaries.

The content of the projects can include any or all of the following disciplines: - heavy lifting, mechanical assembly/disassembly, electrical works, industrial pipework, shipping, packing, demolition or any other required activity.

Group wide you would be joining a professional company currently employing over 300 skilled staff throughout the UK and Europe.

AIS Vanguard is a well-equipped business that holds a large stock of specialized lifting and installation equipment designed to carry out our specialized engineering

tasks allowing us to carry out our duties safely.

Main Duties

- Working to pre-prepared RAMS
- Adhering to relevant health & safety rules & requirements
- Correct use of tools & lifting/handling equipment
- Assembly & disassembly of machinery, plant & equipment
- Jacking, skating, hoisting, skidding various loads
- Working within set time budgets
- Complete relevant company paperwork relating to safety & assets
- Ensuring the correct presentation of yourself & your equipment

This list is not exhaustive, and you will be required to undertake other duties as directed by your manager.

About You

Apply if you have proven relevant experience of any of the following:

- Rigging, Machine Moving, Jacking Skating, Mechanical Fitting, Slings, Plant Operations

Other key skills/qualifications that would be advantageous:

- Accredited Machine/Load Moving Qualification
- Accredited Slinger Signaller Qualification
- Accredited Forklift truck/Telescopic Handler Qualification
- Accredited Access Platform Qualification
- SSSTS/SSMTS/Safety Passport
- A strong safety ethos

Moving Industry Forward

- Good teamwork skills
- A positive and enthusiastic attitude
- A full driving license
- A drive to succeed & be the Best
- A 'Can Do' Attitude

You must also align to the company's core values.

- Teamwork
- No Nonsense
- Commitment
- Attention to Detail
- Hard Work
- Fairness

Additional Benefits:

- Overtime for out of hours working
- Travelling paid as working time
- Lodge & meal allowance
- Death in Service benefit (2 x basic salary)
- Pension

"All personnel have responsibilities to apply the requirements of IMS systems and to make a positive contribution to constantly improve our QESH performance."
