

We are looking for a Project & Operations Coordinator to support our growing portfolio of wind energy projects, with a strong focus on crane operations and heavy lifting projects across Germany and Europe.

Hybrid: Home-based + regular site visits
Germany & Europe
B2B preferred | Hourly rate or salaried employment also considered

Key Responsibilities:

- Project planning, mobilisation and day-to-day operational coordination
- Coordination of manpower, subcontractors and site resources
- Travel & accommodation planning
- Fleet, tools & equipment coordination
- Support with crane mobilisation/demobilisation and heavy-lift logistics
- Monitoring project schedules, progress and costs
- Preparing and maintaining Daily Reports, progress reports and timesheets
- Project documentation and reporting
- Budget monitoring and cost control
- Customer and subcontractor communication
- Site visits and HSE inspections
- Supporting Project Managers with operational issues and project delivery

What We're Looking For:

- Experience in project/operations coordination, logistics or site coordination
- Wind energy, cranes, heavy lift, construction or industrial experience is an advantage
- Strong organisational and communication skills
- Commercial and cost awareness
- English – good working proficiency
- German – good working proficiency
- Category B driving licence
- Willingness to travel regularly across Germany and Europe
- Comfortable working independently both from home and on site

What We Offer:

- Flexible hybrid working model
- B2B cooperation preferred, with hourly rate and salaried options also considered
- Competitive remuneration depending on experience and form of engagement
- International wind energy and heavy-lift projects
- Long-term development opportunities within a growing project portfolio
